

The Greenhouse Gas (GHG) Technology Center, in collaboration with USEPA's Office of Air and Radiation, the Government of Canada, Southern Company, Consolidated Edison of New York, Super Blue Box Recycling Corp. (SUBBOR), Gas Technology Institute (formerly GRI and IGT) and other industry and government cosponsors, is hosting an international forum that will identify and examine commercial-ready GHG mitigation and monitoring technologies. The forum will be held at The Roosevelt Hotel in New York City, NY. Industry and organizations with active GHG mitigation programs will showcase their products. Updates on current GHG legislative actions, trading, verification, reporting initiatives, and private sector mitigation efforts will be provided by recognized experts from government, industry, and international institutions. To submit an abstract, or for additional informaton, please visit the [Center's Web Site](#) [EXIT disclaimer >](#) or contact [Linda Beard](#).
